SUMMARY

Data Science student with a strong foundation in Python, machine learning, and data analysis, experienced in building end-to-end projects from data preprocessing to model evaluation. Passionate about solving real-world problems using data-driven approaches and continuously learning emerging AI and analytics technologies

EDUCATION

Bachelor of Technology 08/2023 – Present
Narula Institute of Technology Kolkata
Computer Science and Engineering
CGPA: 8.08 (upto 5th sem)

Higher Secondary 04/2022 – 04/2023
Sudhnir Memorial Institute Kolkata
Completed HS education from Sudhir Memorial Institute, scored: 89.02%

Secondary 04/2020 – 04/2021
ST. Xavier's Institute
Completed the secondary education from St. Xavier's Institute, scored: 90.25%

SKILLS

Programming Languages:
Java, Python, C/C++

Database Management:
SQL, MySQL

Frameworks & Libraries:
FastAPI, Scikit-learn, Pandas, NumPy

Tools & Platforms:
Git, GitHub, Docker

CERTIFICATES

Programming in Java NPTEL
Scored: 92/100

Data Science Internship Program-EdiGlobe, ShadowFox

Google AI-ML Virtual Internship
EduSkills in collaboration with AICTE.
Secured 100% marks

PROJECTS

Eye Disease Detection using Deep Learning (OCT Images)

- Developed a Deep Learning model to detect eye diseases using OCT (Optical Coherence Tomography) retinal images.

Titanic Disaster prediction model using DVC

- Developed a machine learning model to predict passenger survival using the Titanic dataset. Implemented a data versioning pipeline using DVC to track datasets, model versions, and experiments.
- Performed data preprocessing, feature engineering, and model training using Python and Scikit-learn. And built a structured ML workflow ensuring reproducibility of training and evaluation stages.

AI-Powered Smart Attendance System

Tech Stack: FastAPI, PostgreSQL, RetinaFace, InsightFace, OpenCV, Docker

- Developed an AI-powered attendance system for multi-face classroom recognition and automated attendance marking.
- Built a modular FastAPI backend with embedding generation, attendance management, and PostgreSQL integration.
- Implemented RetinaFace and ArcFace-based recognition using cosine similarity and confidence thresholding.

EXPERIENCE

EdiGLobe Internship 09/2025 – 10/2025

Data Science Internship Kolkata

- Worked on Titanic survival prediction, achieved 97% accuracy.
- Built and trained Spam-Ham prediction model.

ShadowFox Internship 08/2025 – 10/2025

Data Science Internsip Kolkata

- Worked on data preprocessing, feature engineering, and model training
- Built and evaluated machine learning models using Python and Scikit-learn for predictive analysis tasks
- Performed exploratory data analysis (EDA) to identify trends, patterns, and insights from real-world datasets.
- Assisted in feature engineering and model performance optimization using evaluation metrics like accuracy and ROC-AUC.
